

AN ASSURANCE!

CALTEX PETROL

IS
Activated
with
ICC

ICC (Ignition Control Compound) . . . the new additive perfected by Ethyl Corporation, producers of Anti-Knock Tetraethyl Lead introduced 32 years ago, is now incorporated in CALTEX PETROL. This additive is the newest achievement of Ethyl Laboratories and is designed to prevent preignition and spark plug fouling.

When a HIGHER OCTANE petrol is permitted, CALTEX will be ready to supply it. Meantime there is *no* better petrol than CALTEX Activated PETROL.

Have you tried it lately?
