

'ENGLISH ELECTRIC'

the AUTOMATIC COOKER

which sets the housewife

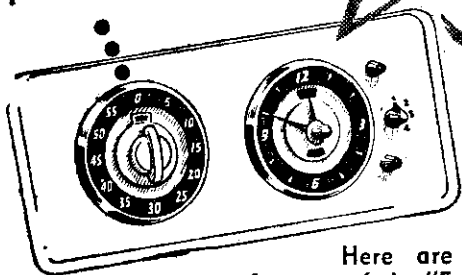

GLORIOUSLY FREE!

Here's the Cooker for the working wife, or for any wife who wants more leisure. Put your dinner in the oven—hours beforehand if you like—and the simple automatic oven timer will switch the oven on at the time required; will switch it off when cooking period has elapsed. In addition, you have an automatic alarm timer which you can set to warn you when you use either oven or top plates.

HERE'S HOW IT'S DONE!

AUTOMATIC ALARM-TIMER—
Rings for six seconds at any pre-set interval up to 4 hours.

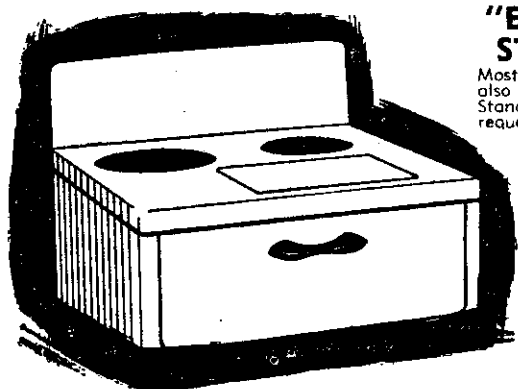

AUTOMATIC OVEN TIMER GOVERNED BY ELECTRIC CLOCK—
Switches the oven on and switches it off again at any times you have pre-selected.

Here are other "gold medal" features of the "English Electric" Cooker:

- Fluorescent Lighting over Cooking Top.
- Warning pilot light glows when top plates are "on."
- Roomy oven—cooks for eight—thermostat control.
- Non-tip oven racks.
- Simmerstat control on top plates.
- Long-life, heat-retaining elements.
- Radiant type top element if required.
- All elements plug in, pull out, for ease of cleaning.
- Available in white or cream.

The "English Electric" Automatic Cooker costs less than you'd expect—it's the first moderately priced automatic cooker on the market.

"ENGLISH ELECTRIC" STANDARD COOKER

Most of these outstanding features are also found in the "English Electric" Standard Cooker. Full details given on request.

Do you remember the Canberra Jet plane? 'English Electric' developed it. Some of the boldest projects of the Atomic Age are identified with the unique research and engineering facilities of The English Electric Company Ltd.
