Garden shear . . . modern version!

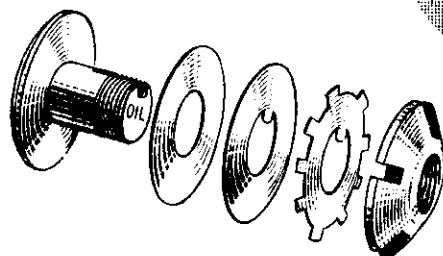

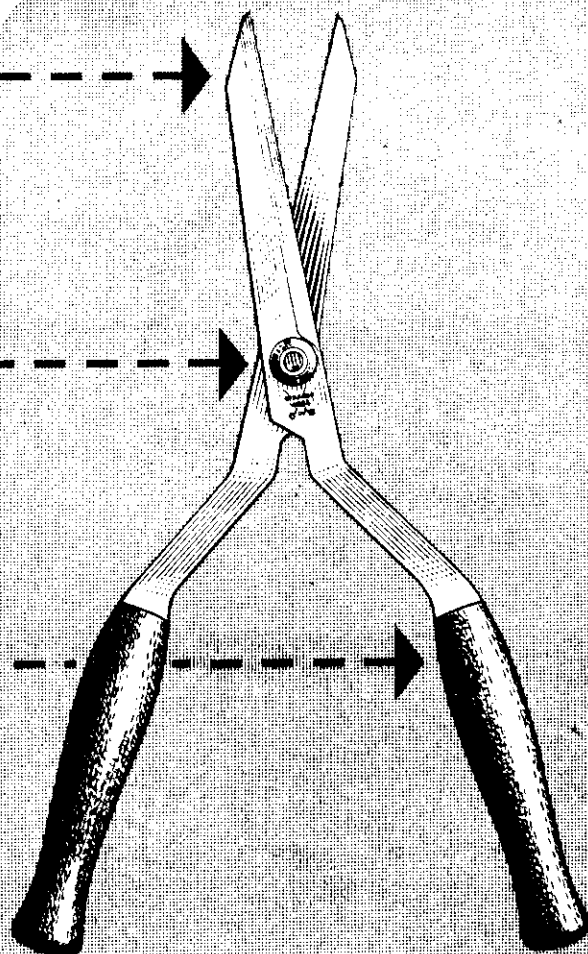

Hollow Forged Blades
make this new shear 1 lb.
lighter than any other of
comparable size, while
the same strength is
maintained with keener
cutting qualities.

A large hardened floating
bearing ensures smooth
working of the blades.
As the bearing is not
dependent on a spring it
will wear longer.

The solid tang handles
have been designed to
provide comfort and ease
of body movement, and
also to ensure that the
handles do not loosen or
become detached.

This diagram shows the Floating Bolt
assembly—a unique feature which en-
sures long wearing life and smooth easy
action.

The Wilkinson Sword W.412 Garden Shear represents
a revolution in Garden Shear design. The tapered rust-
resisting hollow forged blades combine strength with
lightness. The Floating Bolt gives a smooth easy action.
Using no spring it offers a long wearing life and is adjust-
able when necessary. This shear has been scientifically de-
signed with an eye to ease of cutting, and is undoubtedly
the finest instrument of its kind available.

AVAILABLE FROM ALL GOOD
HARDWARE STORES AND
SEEDSMEN.
