LEAK AMPLIFIERS

**For Realistic Home Listening
at Low Cost!**

RADIOS — RECORDS — TAPE

The New "Leak" TL/10 Amplifier, as illustrated, provides for the first time in New Zealand the means by which the music lover can enjoy the Realistic reproduction available from modern recordings . . . at their true value . . . in his own home at a price within the means of the average family.

Many people in this country now have heard, at some time or other, wide range equipment in the hands of experts and sound enthusiasts. On most occasions, such demonstrations have left the visitor with the desire to possess similar means to hear, in full, the true reproduction of all instruments used for the creation of music. Also, on such occasions, the visitor departs with the realisation that he cannot afford it.

quick! Elastoplast

Cut neglected . . . cut infected? No! Not if you use the right first aid treatment: clean wound at once, then protect it. Use an Elastoplast dressing — it's neat, elastic and it stays on.
