Now! An exciting new musical thrill awaits you at your local radio dealer—when you hear the new Collaro RC456 Record Changer—the first in New Zealand to offer FOUR speeds. Now you can play 33 $\frac{1}{3}$, 45, 78 R.P.M. and 16 $\frac{2}{3}$ R.P.M. for 'talking books' records. Other features you will admire about this brand-new COLLARO changer include:—

MANUAL PLAY—Manual/Automatic switch—when placed in MANUAL position, changer is placed out of cycle. The STOP/START switch then only stops or starts the turntable and the pick-up can be placed on any part of the record without the AUTOMATIC STOP operating. When switch is placed on AUTOMATIC position the changer will operate and cycle normally.

NEW PICK-UP ARM—Of improved appearance the arm has been designed with greatly reduced resonance characteristics. Ball bearings with their associated resonances have been entirely eliminated.

PICK-UP LIFT MECHANISM—Immediate lift of pick-up when "Reject"

control is operated eliminates "running down" effect.

CONSTANT SPEED CHANGE CYCLE ON ALL RECORDS—The change mechanism is driven directly from the motor, thus the drive to the turntable is not subjected to heavy loads during the changing cycle. The accurate driving surfaces of the pulleys are therefore preserved without wear or damage.

When you buy a radiogram be sure it is fitted with a Collaro changer for perfect record reproduction.

See and hear the new Collaro four-speed changer at your radio and electrical dealer's.
