

In your home ... *when* ?

When Television becomes a reality in New Zealand, Bell will build the sets which will grace your home. Already, fine sets have been designed and completed by Bell's master craftsmen to bring the best of Television into your home at an amazingly low price.

Yet T.V. does not replace radio, and Bell, the organisation which has guided modern trends in domestic radio, will continue to strive for further perfection in this field.

Bell, your best buy in today's radio, will also be your best buy in the Television world of tomorrow.
