## DX NOTES

**THESE** notes bring news about stations in other countries, programmes information and details of special broadcasts for New Zealand listeners. They are supplied by the New Zealand Radio DX League, 212 Earn Street, Invercargill, from which further information can be obtained.

**A**USTRALIAN stations on July 1 made several frequency changes, to free additional frequencies for new stations. The Scottsdale station in Tasmania, 7SD, moves from 1450 to 540 kc.; 7QN in Queenstown, Tasmania, from 540 to 630 kc.; and 5AU Port Augusta, South Australia, from 1400 kc. to 1450 kc. This leaves only 2PK Parkes N.S.W. on 1400 kc., which should improve the coverage which 2YX Wellington can give when this station is in service during Parliamentary broadcasts.

**OKINAWA:** A new station for the Far East Broadcasting Company of Manila is soon to be established in Okinawa with missionary programmes directed to Asia and the Middle East. The new 100,000 watt transmitter is expected to operate on 850 kc. The transmitter buildings are to be started later this year and the new transmitter (formerly operated in the United States by Associated

Broadcasters of San Francisco as short-wave station KWID) will then be installed. Meanwhile back in Manila work is progressing on the new 50,000 watt transmitters, which were also operated in San Francisco and these will continue to operate on the shortwave bands, and take over some of the frequencies at present in operation. FEBC is best received during the afternoons on 21515 kc., in the 13-metre band, and at night on 15300, 11850, 9735, and 6030 kc. Gospel broadcasts are carried in many languages, and when the additional transmitters are in operation the English schedule will be greatly extended.

## SHORTWAVE

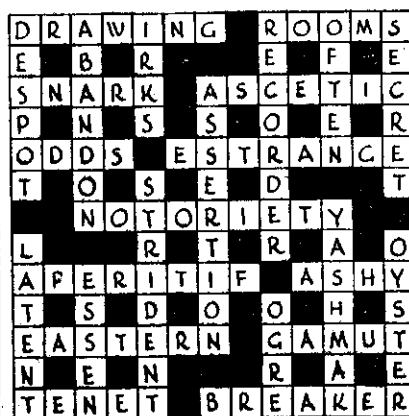

**CANADA:** A special broadcast from Montreal will be heard next Monday, August 4, during the *Listeners' Corner* programme. The broadcast will honour the 25th anniversary of the New Zealand DX Radio Association, and tribute will be paid by the CBC to this organisation. The Montreal service to New Zealand is heard each day from 8.30 to 9.15 p.m., and uses 9630 kc. and 11720 kc. in the 31 and 25-metre band. The *Listeners' Corner* programme each Monday at 8.45 p.m. is introduced by Earl Fisher who reads extracts from letters received in the mail from all parts of the world. Canada is received best in the 31-metre  
(continued on next page)

## "THE LISTENER" CROSSWORD

(Solution to No. 909)

### Clues Down

- 1 and 15. No, it does not mean Gallic refinement, although it is extremely fresh! (6, 6).
2. Spanish gentleman who concealed himself over a ruined gaol? (7).
3. It frequently gets 16 down in the eye (6).
4. A witty retort proceeding from the pear tree (8).
5. You and I are personally pro these (5)
6. Its contents are usually blue, black or red, but it could change to pink (3, 3).
11. You might need the centre-half, or even the three-quarters, if you got one in your finger (8).
14. Topical alteration to a classical building (7).
15. See 1 down.
16. It would be a clever milliner who could make a red hat using only this (6).
17. Naturally the florist keeps them! (6)
19. This person is proverbially de trop (5)

### Clues Across

1. For the motorist, it definitely isn't 17. Naturally the florist keeps them! (6)  
cricket! (3, 3, 3). 19. This person is proverbially de trop (5)

7. Give written approval of an operation or a red nose (7).

8. The courage which is mostly chance (5).

9. A very common thing to catch! (4).

10. The sort of meal which would make a calf sore? (8).

12. If you put the spool into the machine the wrong way round, these would most probably result (5).

13. Strangely enough, it makes me cry (5).

18. In truth, I go once for all (8).

20. Tips back to hold the joint (4).

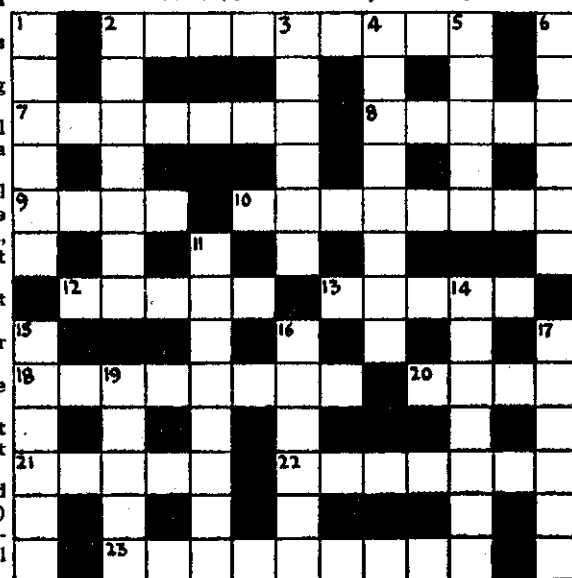

21. I may be mad, but I do it a different way (5).

22. It may be stretched out, as the cat lies (7).

23. Not the sort of person to dread evil (4, 5).
