WHEN PEOPLE TAKE
 A GUESS AT YOUR AGE...
 how close do they get?

To look younger and live longer—everyone over 35 needs an adequate Vitamin/Mineral intake

Why is it some people look as if they are in their early thirties—when they have actually passed the forty mark? And why is it others look tired and old—long before

their time? Leading authorities say it is often due to vitamin and mineral deficiencies in diet. When you get the right amount of life-giving vitamins and minerals in your diet, you look and feel young. But, starve yourself of these—or even be just below the correct daily amount you need—and it will show on your face, and in every movement. Be sure your Vitamin/Mineral intake is adequate—take Vykmín daily.

From Chemists only.
