

Young Farmers' Contest

LAST year the NZBS participated for the first time in the Australian Young Farmers' Leadership Contest, which is designed to select the best "young farmer" in the two countries by means of microphone tests conducted and judged by expert farmers. This year New Zealand will again participate, and the first provincial final will be broadcast from Stations 3YA, 3YZ and 2XN at 8.15 p.m. on Tuesday, February 28. The questionmaster will be E. G. Smith and the judges Alan Dingwall, J. E. Strachan and Bruce McLeod. The Auckland district final will be broadcast from 1YA at 7.0 p.m. on Wednesday, March 1, with the questionmaster A. J. Kerse and the judges H. Woodyear-Smith and Jack Aylesbury.

The organisation of the contest, in which the local prize is a free trip to Australia to compete in the Australian finals, is as follows:—From all over the country young men of under 21 are selected for their qualities of leadership, personality, farming knowledge, and their ability to give a good account of themselves before the microphone. The six Australian State finalists and the New Zealand winner attend the Sydney Royal Show, where the inter-Dominion finals are held. The NZBS is co-operating with the Young Farmers' Clubs in New Zealand, who have invited nominations from their districts throughout the country so that the first stage of the elimination (that which is being broadcast next week) can be carried out on a district or regional basis.

Although the initial stages are not broadcast the district finals are. The Canterbury-Westland-Marlborough-Nelson winner is being selected on February 28 (at 8.15 p.m.), and the Auckland-North Auckland representative on March 1 at 7.0 p.m. The Wellington finals will be broadcast on March 7, from 2YA and 2ZA. The date of the Otago-Southland selection is still to be decided upon, but the Dominion finals will probably be broadcast in a national link on March 14. The winner chosen from the four district finalists will be sent to Australia, where he will be the guest of the ABC while he is contesting the Australasian finals. The nature of the prize to be won in that contest has not yet been announced.

A TIP FOR HOUSE-PROUD WOMEN

All housewives agree "a minute with MIN works wonders." MIN, the new furniture wax cream, gives a beautifully polished sheen to all fine finishes such as Pianos, Radio Cabinets and treasured furniture. Always keep a tin of MIN handy—it's simply perfect for cleaning and polishing enamel and paintwork. Yes, you'll agree, MIN is the Furniture Cream with a hundred uses. A little MIN applied with a cloth quickly removes fingermarks from doors and cupboards. Remember a minute with MIN gives a perfect polished surface. Ask your grocer for the Red MIN Tin.

N.Z. LISTENER, FEBRUARY 24, 1950.

Do you know?

AZTECS HAD GOLD TEETH!

SKULLS OF AZTECS HAVE BEEN DUG UP CONTAINING GOLD INLAID TEETH. TODAY YOU CAN HAVE GLEAMING WHITE TEETH BY USING KOLYNOS. AFTER KOLYNOS, TEETH SHINE WITH NEW LOVELINESS.

TOMMY DORSEY — KOLYNOS FAN!

TOMMY DORSEY—FAMOUS BAND LEADER ALWAYS USES KOLYNOS. YOUR TONGUE WILL APPRECIATE REFRESHING KOLYNOS THAT COOL MINTY FLAVOUR LASTS AND LASTS.

MAGNETIC MOLARS!

A LONDON DENTIST HAS INVENTED FALSE TEETH THAT STAY IN PLACE BY MAGNETISM! KOLYNOS WILL HELP YOUR NATURAL TEETH LAST A LIFETIME. ONLY KOLYNOS FIGHTS TOOTH DECAY THESE THREE WAYS.

- 1 KOLYNOS NEUTRALIZES MOUTH ACIDS.
- 2 KOLYNOS KILLS THE BACTERIA (ENZYMES) WHICH PRODUCE THESE ACIDS.
- 3 KOLYNOS LEAVES TEETH PERFECTLY CLEAN.

KOLYNOS DENTAL CREAM

CLEANS BETTER
TASTES BETTER
LASTS LONGER

TWO TUBES FOR THE PRICE OF ONE!

ALL YOU NEED IS HALF-AN-INCH OF KOLYNOS ON A DRY BRUSH. THAT MEANS ONE TUBE OF KOLYNOS LASTS AS LONG AS TWO TUBES OF ORDINARY TOOTHPASTE.

Kolynos (N.Z.) Ltd., 60 Kitchener St., Auckland.

Only POLAROID
SUN GLASSES AND SUN SHIELDS
give you this scientific protection!

Polaroid Sun Glasses and Sunshields are smart... fashionable... safe too because they're scientifically correct. The diagram shows how Polaroid Sun Glasses and Sunshields scientifically filter out blinding reflected glare yet retain rich natural colours.

- A. Bright natural light from the sun strikes a coloured surface such as water, glass, streets, buildings, sand, etc.
- B. Some rays bounce off as glare; others reflect to the eye as useful "seeing" rays, show colour and detail.
- C. With ordinary sun glasses both the glare light and the useful light are dimmed equally, glare remains to hide detail and dilute colour.
- D. Polaroid Sun Glasses and Sunshields cut out the annoying white glare, reveal detail and allow undiluted colour rays to pass through.
