*How new
is a
frook?*

Is it brand new, or does it look like new? In either case, how can you keep it that way? How can you make all your pretty things last longer—and go on looking lovely? Well, the answer to that problem is the ACME Cleanser-Wringer.

It's the scientific combination of Pressure Distribution and Pressure Indication that does the trick! Acme pressure distribution operates over the whole length of the resilient rubber rollers and wrings the thin as well as the thick parts of the wash, expelling embedded dirt along with the surplus water ... while Acme's new 3-point

pressure indication takes the guesswork out of wringing. Everything from a bib to a blanket, gets exactly the right pressure suited to its weight and texture without any strain on delicate fibres. The whole wash—silks, cottons, linens, woollens—comes out fresher, cleaner, and with longer life ahead.
