

For the Happiest Christmas of His Life!

GIVE HIM THE LATEST AND GREATEST *Remington* SHAVER

FASTER, CLOSER, SMOOTHER SHAVING THAN EVER BEFORE

During the exhaustive tests to which this new Remington Shaver was put before marketing, it was found that a quick worker could shave in as little as 60 seconds—hence the name: Remington 60.

Men with really tough shaving problems have known for years that you cannot better a Remington, but now here is an even better Remington.

And here are the special reasons why the Remington 60 is so far ahead:

NEW, COMPACT AND PRACTICAL DESIGN, giving a light and comfortable fit-the-hand grip and perfect control.

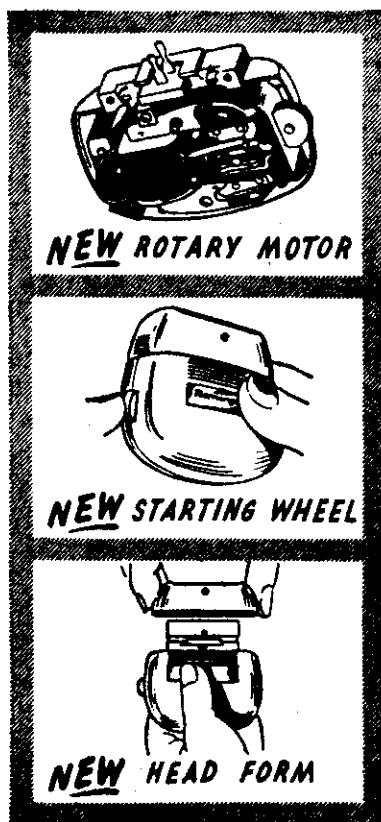

NEW EXTRA-LONG SHAVING HEADS, whose 132 diamond-honed cutting edges give the astonishing total of 16 million cutting movements a minute.

NEW POWERFUL ROTARY MOTOR, compact and precision-built, easily driving the now longer shaving heads.

NEW TYPE OF STARTING WHEEL, which starts the motor with a flick of the finger but stops still while the shaver is running.

NEW DESIGN OF PLASTIC HEAD-CAP with special hair pockets, made to snap off without trouble.

NEW INSTANTLY-REMOVABLE HEAD-FASTENING, without bolts or screws, makes cleaning easy.

Even if you don't want to shave in 60 seconds, you really should see this modern shaving masterpiece. There's a Remington retailer near to you—call for a demonstration.
