DEFECTIVE SIGHT

Is caused by the Eye being too long, too short, or the front of the Eye being of uneven curvature. These defects cause headaches, neuralgia, pains in and about the eyes, and are a great strain on the nervous system. Very often other organs are blamed when the eyes are the real cause. Medicine in these cases is useless, but the eyes should be tested on scientific principles by one who has MADE A STUDY of this BUSINESS ONLY and is a THOROUGHLY QUALIFIED EYE SPECIALIST. Glasses prescribed after such an examination are the only sure relief.
