For Economical Delivery Work the most Efficient Machine on the Road

W. A. Justice and Co, Otago Agents Princes Street, Dunedin

"FIBROLITE" CORRUGATED ROOFING.

"FIBROLITE" is composed of Long Fibred Asbestos and Cement.

It has been demonstrated that "FIBROLITE" is vastly superior to iron, and is easily fixed.

It is impervious to the effects of sea air, acids, and fumes. It is absolutely fireproof, and contracts 70 degrees less heat and cold than iron.

Cost of upkeep is less—no painting necessary; but should painting be specially desired for color effect, it can be economically carried out.

Another distinct advantage is that with "FIBROLITE" Corrugated Roofing there is no metallic taste in collected water.

"FIBROLITE" hardens with exposure, therefore with length of service it improves.

"FIBROLITE" is firmly supported in its claims by over fifteen years' experience.

It is supplied 42 inches wide by 5ft, 6ft, 7ft, 8ft, 9ft, and 10ft long.

Covering capacity compared with iron—260 square yards, allowing for lap, covers approximately the same as one ton 26 gauge or 29cwt of 24 gauge iron.
