

CLARK'S PATENT

RAIN DRAFT AND DUST EXCLUDER FOR DOORS.

THIS Invention is a Perfect Preventive of Rain, Wind, or Dust from entering the building under the door, and applied to inner doors stops all draughts from entering the room. The appliance is simple in construction, acts with certainty and cannot get out of working order when properly fixed. The opening of

the door raises the flap, the closing depresses it and seals the opening of the door at the bottom. Have one fixed and the resulting comfort and safety will astonish you. Price Small. Advantages many. Try one!
