## SMOKE MOTOR MIXTURE

Composed of the Best Virginian Leaf,  
and Leading English Tobaccos.

Embodies the delightfully cool and  
fragrant qualities of the most  
expensive English mixtures.

Does not burn away like hay.  
Remains dry to the bottom of pipe.

NOTE THE PRICE—

8s. per lb. (postage paid).

PREPARED ONLY BY

**G. H. PRICE & CO.,**  
NAPIER.

# ARE YOU PREPARED

to HOLD a better position if the OPPORTUNITY presents itself?

**M**ANY a man believes he has been ill-treated by the World, and that success, which appears so easily attained by others, is forever just beyond his grasp. Why? If you could look into his past you would not have to guess. The answer would be as plain as day. He could not, through lack of education, take advantage of the opportunities that crossed his path.

## THE AMERICAN SCHOOL OF CORRESPONDENCE

CHICAGO, U.S.A.

offers you the connecting link between the present and the future. It offers the opportunity to redeem the past and start anew. It places within your grasp the rungs of the ladder of success, and it will help you to climb if you are ready to help yourself. Engineering offers a wider field than any other profession to the progressive, wide-awake young man.

As a proof of this examine the "want columns" of any newspaper, and see the constant and increasing demand for engineers and draftsmen, compared with the occasional call for clerks, bookkeepers, etc. This shows the tendency of the times, and opportunities for which you should begin to prepare **NOW**.

The American School of Correspondence is the **only** correspondence school which makes a specialty of engineering work, and the **only** correspondence school whose instruction is credited for entrance to American engineering schools and colleges.

Tuition fees are moderate—from £5 up—and may be paid in small payments.
