Printers of "Progress."

CARE for MORE BUSINESS ?

You can have it if you go after it the right way.

Advertise for it—but advertise right.

With printers' ink you can reach 1000 people in the time you could talk to one,—but the printers' ink must tell your story right to be effective.

The effective use of printers' ink is my business. I want to use it to increase your business. May I?

Ronald S. Badger,
Advertising Agent. CHRISTCHURCH.

ARE YOU PREPARED

to HOLD a better position if the OPPORTUNITY presents itself?

MANY a man believes he has been ill-treated by the World, and that success, which appears so easily attained by others, is forever just beyond his grasp. Why? If you could look into his past you would not have to guess. The answer would be as plain as day. He could not, through lack of education, take advantage of the opportunities that crossed his path.

THE AMERICAN SCHOOL OF CORRESPONDENCE

CHICAGO, U.S.A.

offers you the connecting link between the present and the future. It offers the opportunity to redeem the past and start anew. It places within your grasp the rungs of the ladder of success, and it will help you to climb if you are ready to help yourself. Engineering offers a wider field than any other profession to the progressive, wide-awake young man.

As a proof of this examine the "want columns" of any newspaper, and see the constant and increasing demand for engineers and draftsmen, compared with the occasional call for clerks, bookkeepers, etc. This shows the tendency of the times, and opportunities for which you should begin to prepare **NOW**.

The American School of Correspondence is the only correspondence school which makes a specialty of engineering work, and the only correspondence school whose instruction is credited for entrance to American engineering schools and colleges.

Tuition fees are moderate—from £5 up—and may be paid in small payments.

The "SHARPLES" TUBULAR Cream Separator.

THE Tubular skims cleaner, is easier to wash, skims colder milk than any other Separator, is self-oiling. Supply can be low and the most convenient. The Tubular is, in fact, the Machine for a Farmer to have, and we recommend it to all progressive Farmers who are looking for the best.

NATIONAL GAS ENGINE AND PRODUCER PLANT.

The Gas Producer Plant that secured Gold Medal against all competitors at the Royal Agricultural Society's Show, at Derby, England, June, 1906
