

Austin Rock Crushers.

THE AUSTIN Jaw Crusher,

illustrated herewith, will positively crush more rock, or boulders with less power than any other crusher, will cost less in repairs, and will give better satisfaction. As compared with hand breaking, it will absolutely save its whole cost in 30 days.

That is a pretty big claim, but we will gladly produce figures and testimonials from numerous local bodies throughout New Zealand in proof.

We furnish Crushers with Elevators, Screws, Riddles, etc., for handling any kind of material, and will design the whole plant and submit drawings on request.

We make a specialty of this Line and invite enquiries.

There are few more profitable investments for contractors or local bodies.
