

The Best Iron Made

Is that which is forged and rolled from selected scrap. It is tougher, more malleable, and has a greater tensile strength than iron made from common pig, and is fibrous and homogenous, not short and crystalline in the grain.

"IRMO" IRON

Is just such an iron made in a highly equipped Rolling Mills and manufactured in every section in common use. Exhaustive scientific and practical tests have proved that "IRMO" rivals the best imported brands, and every bar reaches the buyer straight and true. Special sections can be rolled. Send for Prices and Table of Sizes. We are buyers of Scrap Metal.

The Choice of a Building Stone

Depends on price, beauty of appearance and its ability to withstand the ravages of climate and time. A popular building material that conforms to these requirements is

The "K" Brand Oamaru Stone

Its good qualities have been proved by a fifty years' test and endorsed by leading architects and builders. This stone can be seen in many old public buildings as well as those being constructed to-day.

Large quantities always in stock in our Quarries at Teachemakers. Full particulars from:

H. S. BINGHAM & CO., LTD.
Head Office: Moray Place, DUNEDIN.

Economic BLACKSTONE

Cannot be beaten for Simplicity, Reliability, Durability, Ease of Operation and Economy

These Engines have a good reserve of power, and develop their rated horsepower at a low speed. They are therefore a bigger engine for the money than most. Can be fitted up for hoisting, pumping, well-driving; largely used for shearing and milking, and because of their simplicity are much appreciated by farmers.
