

**T**HIS picture illustrates the simple manner in which "POILITE" Sheets are fixed when used for Walls or Ceilings. By varying the arrangement of panelling a scheme may be worked out to suit every individual room in a house.

"POILITE" Sheets may be papered (without scrim) with a result equal to what would be obtained on best plaster.

Exterior Walls of "POILITE" are economical in first cost, everlasting and fireproof. Roofs of "POILITE" Tiles have numerous advantages over any other style of roofing material.
