

AMIWUD

WHAT IT IS:

Amiwud is imitation Hardwood, made from Wood Pulp Board, for panelling Dados, etc., but the grains are a mechanical reproduction (not imitation) of the artistic Oak and other Hardwoods. It is identical in effect and appearance, but better, cheaper and more practical in results. The grains and colours are reproduced on a chemically treated wood-fibre pulp substance, subjected to a great hydraulic pressure, and treated with ingredients which make it proof against moths and vermin, also much safer than wood from fire. We reproduce: -

Golden Oak, Weathered Oak, Jenisero, Mahogany

It is also made in PLAIN Finish, which will take Wallpaper, Paint, Kalsomine, etc.

Manufactured by **THE PARAFFINE PAINT COMPANY, San Francisco.**

Australasian Office:

**CHALLIS HOUSE, MARTIN PLACE,
SYDNEY.**

D. S. Evans, Australasian Manager.
