

Something More for Progressive Local Bodies!

THREE WHEELED PATTERN

They are "making good" roads in N.Z.

Read what a progressive County Engineer says:

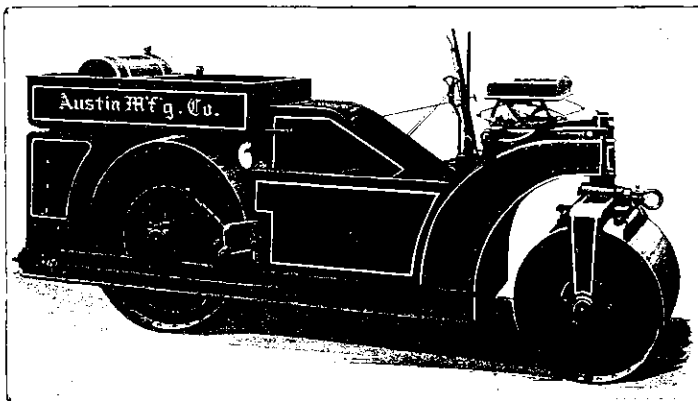

Cook County Council,
(Engineer's Office),
Gisborne,

June 30th, 1914

Re Austin Motor Roller and Scarifier.

I have used this machine for about three months in rolling newly metalled roads, and about one month in scarifying old metal. So far the results have been satisfactory. I consider the Roller well suited to "up country" work, on account of not having to cart coal, coke or water. We have hitherto used benzine, the consumption being 1 case per day of 8 hours. I have not used the Roller yet on grades steeper than about 1 in 14, but have no doubt it will easily negotiate any practical grade. The Scarifier weighs nearly two tons and has 4 heavy tines, all of which were in use at one time.

Yours faithfully,
de JENNES FRASER,
County Engineer.

Keep Your Products Fresh and Good
— during the Summer. Instal —

Sterne's Refrigerating Plant

YOU know the loss incurred in summer through products perishing. To avert this loss, store your goods in a room refrigerated by a Sterne's Refrigerating Plant. A Sterne's Refrigerating Plant will keep a room or building at zero temperature day in and day out at a minimum cost of upkeep. The principle is ammonia-compression, the expanding and condensing of ammonia under great pressure. Worked by Sterne's machinery, this system is the most efficient, reliable, and economical in existence. *Get particulars. We welcome inquiries and gladly give estimates.*
