

C, and wires F, is placed on the ground which is scooped out to form the mould bed. The frame is then removed and the mould

is lined with concrete and the wire netting I, and the frame being replaced the concrete and netting are built up as required.

Cramp for Flooring Board.—A patent No. 38,974 has been taken out by Richard A. Tyler of Broadwater, N.S.W., carpenter, for a cramp. The improved cramp consists of a combination of three main parts, viz.: (1) A clamp having a toothed or serrated member or limb that will be temporarily secured

obliquely to a joist; (2) a lever connected to the clamp by (3) a link. The rear side of the lever will be provided with an articulated spike, which will prevent the lever from receding from its position when it butts against the edge of the last flooring-board. In giving effect to the invention the clamp will
