

## *Industrial Buildings*

present many problems in the selection of the roof covering that will give satisfaction. Some of the most desirable features are moderate capital cost, durability, weatherproofness, lightness, immunity from action of smoke or fumes, ease of fixing, &c. These good points, and more, are to be found in

# *Certain-teed*

Asphalt Roll Roofing, which has proved equally satisfactory on flat or pitched roofs. Drop a post-card to JOHN CHAMBERS & SON LTD., Stuart St., Dunedin, or St. Asaph St., Christchurch, for free samples and price list of this modern roofing. You cannot afford to overlook **Certain-teed** if you are building a Bee-hive, Crib, House, Factory, or Township. It's good for floor-covering also.

Samples and Literature concerning CERTAIN-TEED will be freely posted to anyone interested by
