

Fig. 1.—The foundations of walls and piers, Feb. 14th, 1916. Fig. 2.—Showing progress up to Sept. 2nd, 1918. Fig. 3.—April 28th, 1918. The masonry completed with the exception of the turrets. Fig. 4.—The 'West' front complete. Fig. 5.—A view taken from the North showing the buttresses at the temporary end wall and the temporary Chancel. The great size of the completed portion is evident when comparing it with the Chancel—its own height. Basil B. Hooper, Supr. Architect, Dunedin. Sedding & Stallybrass, Architects, Plymouth, England.
