

IT COULD NOT BE A BETTER VALVE
IF IT BEARS THE INSCRIPTION
"PHILIPS Miniwatt"

IF the mirrored surface of any Radio Valve bears the words "Philips "Miniwatt," you may be sure that it would be impossible to use a more economical valve.

Maybe, your present tubes are getting old and obsolete—replace them with Philips "Miniwatts," selecting the correct types for each socket. Then, hear your old set bring in stations that you never heard before—reproducing music with a clarity you thought impossible.

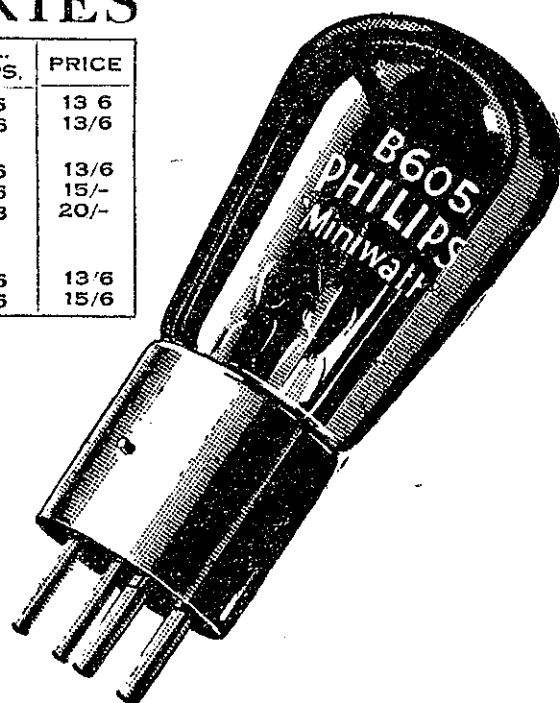

Efficiency—Economy—Long Life—Dependability—you will get them all when you say "PHILIPS."
