

# *Sporting News* --- reported by experts on this wonderful **RADIOLA 17** for a few pence per week

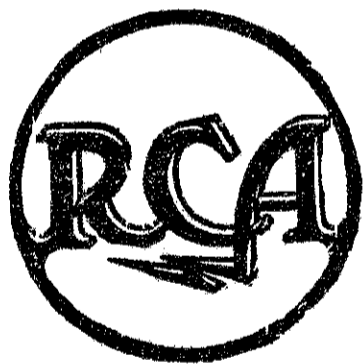

The seven big Radiotrons in the new RADIOLA 17 use about as much electricity from your lighting current as an ordinary 50-watt lamp.

A snap of the switch turns them on. A finger touch of the electrically-lighted dial selects the broadcasting station, and, presto! you are in a ringside or grandstand seat.

Without leaving your easy chair, you hear the round-by-round, play-by-play stories of the big sports events in distant cities, reported by experts. After that you have at your finger touch the finest music, for dinner, or dancing, or an hour of reverie.

A Radiola is as necessary to-day in a well-equipped home as the telephone and the newspaper. Radiolas are in daily use in nearly 2,000,000 homes.
