

Announcing ... the ... **AIRZONE THREE**

Built for New Zealand Conditions

*Beauty
Simplicity
Economy*

*Power
Tone
Low Cost*

These are the factors which governed the building of this delightful compact modern 3-valve receiver. One dial with which to tune in the main New Zealand and Australian Stations—at loud-speaker strength. A power control gives you all the volume needed, with working costs far below the average.

This set will appeal to the Crystal owner who wishes to listen in to distant stations.

The Airzone Three costs little more than a good Amplifier for your Crystal Set.
