VOLUME

Tone—Volume—Distance, these are the three essential qualities which Mullard valves impart to radio reception.

The margin of advantage held by those who to-day buy 1929 Mullard P.M. Filament Valves is greater even than the advantage enjoyed by the thousands who changed over to Mullard four years ago.

When the Mullard P.M. Filament was first introduced those who had radio receivers promptly changed to Mullard, and all new-comers to radio automatically buy Mullard valves.

Universal popularity is the soundest guarantee of efficiency. Get Mullard valves—now.

They make an old set modern.
