

listeners in transmission 3. Both were reported as perfectly received throughout.

Egypt.—The Egyptian State Broadcasting Service relayed via the Empire station, and reported it a "wonderful success."

India.—"The Times" correspondents in Delhi and Calcutta report that reception was good in the former city

The New 4YA

A.W.A.'s Tender for Dunedin Transmitter Accepted

THE Broadcasting Board announces that Amalgamated Wireless Ltd. (Australasia) are the successful tenderers for the new transmitter to be erected at Highcliff, Otago Peninsula. This new transmitter will serve Dunedin and the area in the vicinity. It will have a power of 10 kilowatts and will embody the very latest in transmitting technique. The aerial will be of the umbrella type, which has proved so satisfactory at the new station at Auckland. The wavelength will be the same as that used by the present station.

At present no date can be fixed when this station will be taken into use. The authorities are confident, however, that it will be operating well before the end of the year. At present the existing studio will not be superseded by a new one; plans, however, are in hand for a new studio later on.

and less good in the latter. Nevertheless, in Calcutta the service in the Abbey came through admirably, except for occasional fading. Perfect reception is reported of the recorded version sent out from the Empire station in Transmission 3.

Iraq.—A private listener in Baghdad reported that the reception of a "magnificent transmission" was excellent via the Empire station.

New Zealand reports a successful re-broadcast via the Empire station, relayed by local transmitters.

South Africa.—Reports from Cape-town and Johannesburg indicate that, while reception of the Abbey service was fairly good, they had poor intelligibility during the commentaries by Howard Marshall.

U.S.A.—In spite of the early hour (5.45 a.m.) both the National Broadcasting Company and the Columbia Broadcasting system relayed the broadcast over their Atlantic Coast networks via the Empire station. Reception was reported as excellent in one instance and perfect in the other.

NATIONAL ELECTRICAL AND ENGINEERING CO., LTD., have been appointed by Amalgamated Wireless as the exclusive distributors of A.W.A. Radiolas manufactured by that Company for the New Zealand market. National Electric will also act as distributors of Raditron valves. Mr. Robertson will continue as the New Zealand manager for Amalgamated Wireless.
