

Build Your Own Radio!

Select your Set from one of those described each month in the

N.Z.

RADIO TIMES

In the January Issue full details of construction are included of a New Type of All-Wave Receiver, an exhaustive test of which has given astounding results.

THIS set, **THE LEKMEK DUAL-WAVE SUPERHET**, is a dual-wave A.C. Superheterodine covering the shortwave band from 18 to 50 metres and the broadcast band from 200 to 550 metres. It uses a 6D6 R.F. stage on both bands, giving an unusually high signal-to-noise ratio. Foreign programmes can be heard on this set like locals, and enjoyed not only for the novelty but for their outstanding excellence.

EACH set before being described in the "N.Z. Radio Times" is put through exhaustive tests, and alterations are made until the performance given is of the very highest standard. Buy a "Radio Times" and build you own radio. It makes an excellent hobby and the details of construction are described in such a way that a child could follow them.
