

MARCH 22, 1935.

Vol. VIII., No. 37.

Registered as a newspaper, G.P.O., Wellington.

Price 4d.

Could you pick the Fresh ones?

A basket of handsome and symmetrical eggs . . . some produced with proud cackles but an hour ago, some of uncertain age, and others definitely beyond the pale. But by just looking at them you can't tell one from the other.

With Radio Valves it is much the same. It is absolutely impossible to judge from appearances whether a valve is factory-fresh, or whether enfeebled with thousands of hours of use.

New Zealand Agents:

THE NATIONAL ELECTRICAL AND ENGINEERING CO., LTD.

All Branches.

And from all good Radio Dealers.

The SEALED Non-Refillable Carton is your only Safeguard

Buy Micro-Sensitive Radiotrons and you can bank on getting the world's finest valves straight from the factory—untampered with, and as fresh as the day they were made and tested. Strong metal sealing staples lock up the valve from the factory to your set. It can be tested without being removed from the carton.

Only Micro-Sensitive Radiotrons are obtainable in the Sealed Non-Refillable Carton.
