

--the Key to the World's Treasure House of Music

Modern Radio Engineering has of late made enormous strides and attained a very high standard of efficiency. The Public, surrounded by such marvels of ingenuity, have naturally become hyper-critical.

The rapid growth in the popularity of the Courtenay Radio, in such a keenly competitive and crowded field, speaks volumes for the superlative workmanship and quality of performance with which the name has become synonymous.

"If it's on Earth—it's in Courtenay" is a fair description of these instruments, for, not only are all World Stations within their scope, but also, every worthwhile and tested improvement of any kind for 10 years to come is embodied in their construction. There is an extensive range of 5, 6 and 7-valve models both in AC or Battery Operated.

Truly is it claimed that "the Key to the World's Treasure House of Music" is the New
