GISBORNE IN DAYTIME

WAY out east in the Gisborne district, radio listeners have great expectations from the new broadcasting legislation, the progress of which has been followed there with probably a great deal more interest, from a listener's point of view, than anywhere else in the Dominion.

Gisborne is at present regarded as the worst district in New Zealand for daytime reception. One station has a devotional service in the morning, and the other gives a lunch session twice a week. Otherwise, all local broadcasts are at night.

Therefore a regular daytime schedule which is sought by both Gisborne stations will be a great boon to listeners of the district.

Mr. P. R. Stevens, of 2ZM, told the "Radio Record" correspondent that he hopes to broadcast at chosen intervals between 7 a.m. and 5 p.m.—perhaps beyond that hour—and in preparation for this he is installing a new transmitter to increase the station's power from 80 watts to 250 watts.

Mr. C. T. C. Hands, with 2ZJ, has a more powerful station than 2ZM, and he informed our correspondent that he is arranging a further increase in strength to make it one of the most powerful and most up-to-date B class stations in New Zealand.
