GUARANTEE

Any goods that prove in any way unsuitable may be returned within seven days and your money will be refunded in full.

LEARN MORSE

This Morse Code Practice Set has a wide appeal to both men and boys interested in learning radio code, blinkers, signal and telegraph code. It has been adopted by the boy scouts of America as their national signal set. It consists of a high-light blinkers and key. Operated from two self contained torch batteries of standard size. The signaller is pocket size and the bulb and guard can be removed for carrying. The International Morse Code, in a new, easily read style, is mounted on an etched metal plate directly in front of the operator. The stroke of the key is adjustable. A conveniently arranged switch enables the operator to change from one circuit to another at will. Spring clips are provided for connecting to an additional set. When properly connected, either set can be operated and messages sent or received, signals being received by either the self-contained lamp or buzzer. Instruments finished in black and nickel.

Cat. No. RRH103 15/6 each.

FIND THE COWS

Strange as it may seem, we have sold more of these torches to farmers for finding their cows on dark nights than for any other purpose. However, they can be used for any purpose where a more powerful beam of light is required. Will throw a beam of light for 1,000 feet. Five-cell focussing torches complete with batteries. Ideal for trampers, sportsmen, boating, etc., etc. Cat. No. RRT816. Only 5/11 complete.
