

S.T.C. TRIPLE WAVE Model 5035

Here's the feature list—

New five-band dial, each band lit in separate colours... Air-trimmers for permanent dial accuracy... Metal valves, best for world wide reception... 10" S.T.C. Fidelity speaker... Trouble-proof wave change switch... Automatic volume control... Metal dust cores and a host of others.

greatest distance set ever built!

Yes we know! All your friends have sets that can get London like a local. All our friends have them too, so they tell us! But believe us, even the fiction of distance reception doesn't come anywhere near the truth of this... the stand-out distance receiver of all time!

The only set designed to give perfect reception on 11 metres?

WELLINGTON: G. W. Dodds.
AUCKLAND: J. R. Haydon—
Leaders, Ltd.
DUNEDIN AND INVERCARGILL:
McCracken & Walls.
CHRISTCHURCH: Webleys.

S.T.C.'s No. 5035 doesn't finish at 16 metres. It gets clean down to 11 metres on the overseas band and still keeps dragging them. Dozens of important overseas stations you've never even dreamed of getting before; all click in true, pure, undistorted. There's great news and great entertainment overseas. S.T.C. designed this set to get it for you. Don't take our word. Hear it in action and know for yourself.

Dealers In All Other Centres.

A demonstration proves it.
