

Health in the home

with the aid of
ELECTRICITY

Have you ever thought of the beneficial influence of Electricity in your daily home life?

How easily your home can be kept clean and free from dust and germs with the aid of an Electric Vacuum Cleaner. How pleasant to do your cooking and baking in a kitchen free from fumes, soots and excessive heat.

The safety, reliability and cleanliness of electric lighting alone, apart from many other electrical necessities, has meant a great stride forward in the comfort and health of the modern home.

Truly, it is no wonder the average expectation of life increases as, year by year, new methods are evolved to bring "Electricity"—the greatest servant of mankind—into wider use in the home for the benefit of our daily lives. ...

Make full use of the benefits of Electricity

LIGHTING.

Better light for better sight. Electricity costs little. Make sure of adequate lighting in every part of the home.

HEATING.

An electric fire gives a cheerful glowing warmth without smoke, dirt or soot. Always clean, always ready and extremely economical.

ELECTRIC JUGS.

Nearly every household appreciates the economy of an electric jug for a quick supply of boiling water. Electricity is safest and best for large supplies of hot water too.

RADIO.

Nearly every home enjoys the entertainment supplied by an electric radio. Another modern blessing made possible through electricity.

COOKING.

The advantages of Electric Cooking are manifold. Ask any housewife who uses a modern electric cooker. Her enthusiasm will convince you.

WASHING.

Install an electric washer and save the back-breaking toil of wash days. A modern blessing for the housewife.

TOASTERS.

Have you tried toast fresh from an electric toaster? For even toasting and a quick, easy supply without burnt edges, invest in an electric toaster.

FANS.

An electric fan supplies a cooling breeze in any part of the home instantly at the touch of a switch. A real blessing in hot weather.

CLEANING.

Avoid hard work. Carpets, furnishings and every room in the home are easily kept clean if you have an electric vacuum cleaner.

REFRIGERATION.

Avoid waste—keep food fresh with refrigeration. There is no sour milk or spoilt food in the home equipped with an electric refrigerator.

IRONS.

Every housewife knows the full benefit of electricity for ironing. What a difference to the old days of heating irons on the kitchen range when ironing was really hard, hot work.

RADIATORS.

In the cold weather too electricity is at your service. You will find the glowing warmth of a portable electric radiator indispensable during the winter.

All the above Electrical Appliances contribute toward the
