AROUND AND BEHIND THE DIALS	63
THIS WORLD OF OURS	67

THE NEW *Acoustic Design* JUSTIFIES EVERY CLAIM MADE FOR IT

It's Wonderful!

'Accoustic Design' is an engineering principle. No other radio has it. It means that instead of the receiver, speaker and cabinet being separate elements, they are built in together, in 'tonal complement.' Until you hear the Mullard, you cannot imagine what marvellous results this ensures... high clear notes, rich low notes, every full toned inflection. You've never heard such powerful long-distance reception—it is absolutely sensational. On shortwave, English, European and American stations "come-in" with the full strength and clarity of a local broadcasting station. Mullard is giving a new meaning, a new era to radio reception.
