

This power valve is noiseless!

It's
MADE IN ENGLAND
*...and
made better*

THIS is the Osram MX.245 power valve. Within its characteristic limits it gives unparalleled results in all output circuits—extraordinarily distortionless amplification, ample current capacity, and complete freedom from all microphonic noises. It is the *only* 245 valve in the 2.5 volt range that is noiseless under all conditions of operation. You can test Osram '2.5' superiority at your Radio Dealers. Ask to switch on any set, tune out all stations and tap the 224 or 227 detector. If it is microphonic the speaker will emit a pinging noise, indicative of imperfect reception. If the microphonic valves are replaced by Osram 2.5s, tapping will result in silence.

Osram
2.5
Valves

Ask your dealer also to show you the full range of Osram 2.5 volt valves—
MY.224, MY.227,
MX.245 & MX.280

Only a Few Copies Left "THE RADIO LOG"

The first edition of the "Radio Log" has been so well received that we have almost sold out. Do not be one of the disappointed ones. Procure your copy to-day.

The "Log" is a magazine for long-distance enthusiasts. It is the official organ of the DX Club and is devoted entirely to the wants of our readers.

Obtainable from all radio dealers and booksellers. Price 6d., or send 7d. in stamps to the publishers.

"THE RADIO RECORD"
BOX 1032, WELLINGTON.

RECORD SALES

Thousands were sold in June, and July sales to date represent a 100% increase. Orders already received for August deliveries indicate a further 100% increase.

The reason for these record sales is that Standard Condensers and Standard Audio Transformers are giving absolute satisfaction. They have proved themselves in service all over the World.

Ask your local radio dealer about them.
