For Better Radio Reception

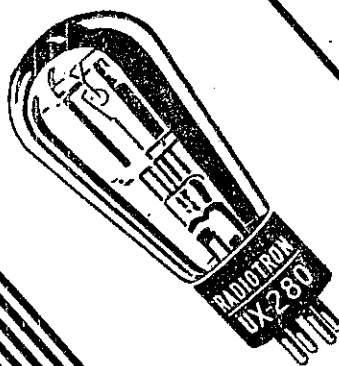

GENERAL ASSEMBLY
LIBRARY

USE

RADIOTRONS

ALWAYS IN EVERY SOCKET

Many unnecessary radio troubles are caused by inferior valves. The finest receiver is handicapped by poorly designed and constructed valves. Radiotrons are the unquestioned standard of scientific achievement in this field. To insure clear, musical tone and maximum performance, leading set manufacturers strongly advise "Radiotrons always in every socket." Your dealer will unhesitatingly recommend them. Replace old exhausted valves with new Radiotrons to-day.
