

AVAILABLE JULY 1986

*50 Years in Music*  
*25/50*  
*Marshall*  
*JUBILEE SERIES*  
*25 Years Marshall Amplification*

Based on Marshall's popular tube Model 2203/2204 Master Volume amps, all Jubilee 25/50 models feature a unique output stage that functions as the classic Marshall circuit but can also be reconfigured from normal high power pentode operation to low power triode operation. This effectively halves the output power, providing 100 and 50 watts operation from the 100-watt models and 50 and 25 watts from 50-watt models. This offers players superior distortion tone and overall performance at low volume levels.

All Jubilee amplifiers feature quiet channel-switching with a specially supercharged Lead mode. Special overdrive and "re-voicing" circuitry in the Lead channel provides an extreme range of distortion effects including very long sustain, even with single coil pick-ups. The Lead Master control is also switched into operation in this mode, enabling the lead channel to be balanced with the "normal" rhythm channel while also providing increased gain into the master section so that solos can be heard over the rhythm setting.

A flexible input gain control modifies preamp gain with a special "pull" switch that permits the rhythm channel to be changed from a high headroom, clean operating condition to soft clipping and heavy overdrive.

The amps' Master E.Q. section features Marshall treble, mid, bass and presence controls of an advanced passive design offering increased sensitivity and range. The output master controls the total output of the preamp section, which allows the lead section to cascade the input gain and lead controls into the output master for further high-powered variations in tone.

The Jubilee Series is exclusively available with a special silver covering and silver control panels contrasted with black. Every Jubilee amp will be fitted with a metallic Jubilee plaque celebrating the 25/50 Jubilee Series.

The Jubilee amps are offered as the full size Model 2555 100-watt and Model 2550 50-watt lead amps with companion 2551A 4 x 12" angled top cabinet and 2551B 4 x 12" bottom cabinet; the Model 2553 "Mini-Stack" 50-watt lead head and the matching 2556A 2 x 12" Mini-Stack angle cabinet and 2556B 2 x 12" Mini-Stack bottom cabinet, and the Model 2558 2 x 12" and Model 2554 1 x 12" tube combos.

MODEL NO	DESCRIPTION AMPLIFIER HEADS	SUGGESTED RETAIL With GST	MODEL NO	DESCRIPTION CABINETS	SUGGESTED RETAIL With GST
2555	50/100 Watt Valve Head	2250.00	2551A	4 x 12" 300 Watt Angle Cabinet	1590.00
2550	25/50 Watt Valve Head	1995.00	2551B	4 x 12" 300 Watt Bottom Cabinet	1590.00
2553	25/50 Watt Mini-Stack Valve head	1895.00	2556A	2 x 12" 150 Watt Mini-Stack Angle Cabinet	1100.00
	COMBO'S		2556B	2 x 12" 150 Watt Mini-Stack Bottom Cabinet	1100.00
2554	25/50 Watt 1 x 12" (Vintage) Combo	2195.00	2551AV	4 x 12" 280 Watt 'Vintage' Angle Cabinet	1790.00
2558	25/50 Watt 2 x 12" (Vintage) Combo	2475.00	2551BV	4 x 12" 280 Watt 'Vintage' Bottom Cabinet	1790.00
			2556AV	2 x 12" 140 Watt 'Vintage' Mini-Stack Angle Cabinet	1250.00
			2556BV	2 x 12" 140 Watt 'Vintage' Mini-Stack Bottom Cabinet	1250.00

You will note in the Speaker cabinets the option of buying the 'Vintage' Cabinets in contrast to the less costly set-up in each case. The 'Vintage' models, incorporate the Celestion 'Vintage' speakers which give a 'warmer' sound, and that is why there is a difference in cost. The combo's you will note have the 'vintage' speakers in them.
