JX-8P POLYPHONIC SYNTHESIZER

Roland

The JX-8P is velocity- and pressure-sensitive.

The JX-8P offers 64 preset patches including extremely thick string sounds, cross-modulated metallic sounds, a variety of special effect sounds, and many more. It can also store 32 programmable patches. In addition, the optional M-16C memory cartridge provides 32 programmable patches. A total of 128 patches can be instantly recalled even during a performance. The Edit function allows all patch parameters to be delicately controlled so as to modify a preset patch or to create a new patch. The optional PG-800 programmer can be used to facilitate editing.

A new Patch Chain function allows the JX-8P to memorize up to 8 combinations of patch.
