professional

THE WORLD'S BEST
Now available in
New Zealand!

AKAI PROFESSIONAL... World leaders in the field of Hi-Tech music are now available in New Zealand. You owe it to yourself as a musician to check out this amazing range of musical tools, and discover why they are rapidly becoming the industry standard worldwide.

- S900** — The world's best digital sampler, with 32 sample points, 40Khz sampling rate, and over 63-seconds of sample time. PLUS, the most extensive editing system available on a sampler today. As used by every major recording studio in Australia and Britain.
- X7000** — The same sound quality as the S900, in a totally affordable keyboard sampler — 16 sample points, 40 Khz rate and much more. Also available as a rackmount. Now the best needn't cost the most!
- MX 73** — A fully programmable mother keyboard with 100 position performance memory, capable of controlling every MIDI function imaginable, from program change to key splits to transposition. Four way splitting and individual control change access. And at a price below most other mothers!

We could go on and on. Like the new drum machines and sequencers designed for AKAI by Roger Linn, inventor of digital drums. Like the amazing EWI synth controller, which gives MIDI capabilities to brass and woodwind players. But we'd rather you see and hear this amazing equipment for yourself.

AVAILABLE ONLY AT AKAI AUTHORISED DEALERS. Phone for the location of your nearest dealer.

AKAI Professional. Now New Zealand can experience the best.
