Series 9000 Pre-Amp

Using advanced solid state circuitry, the 9004 has sounds and facilities of the highest Marshall quality in an incredibly economical rack package. Features include twin independent switchable channels that enable you to flick instantly between widely variable rhythm settings and distinctive Marshall distortion, a headphone output for practice and a gain variable effects loop for connecting everything from stomp boxes to rack effects.

**The only pedal
that's a Marshall...
GUV'NOR - A STACK AT YOUR FEET**

The Guv'nor pedal is more like a mini pre-amp than an ordinary distortion box. Highly effective Treble, Middle and Bass EQ controls provide tonal response and flexibility far in excess of other floor pedals. Capable of everything from simple volume boost to screaming solo sounds, all with traditional Marshall warmth. An FX loop allows linking to other pedals with the Guv'nor acting as the master switch for the whole chain. Rugged all-metal construction and 9V power by adaptor or battery.
