

being asked to do more preliminary sorting and arranging of their records. Notable donations during the year included the papers of several New Zealand artists and a group of watercolours by Joseph Rhodes donated by Mrs B. Rhodes of Australia.

Purchases were maintained at a high level during the year. The most important acquisition was the Guy and Maude Morris collection of Katherine Mansfield books and papers. Although it lacks original Mansfield manuscripts its very substantial strengths in Mansfieldiana make it a major research resource. The letters of Archdeacon J. F. Lloyd, purchased in London, consisting of some 90 letters covering the period 1849–90, provide an illuminating commentary on events of the colonial period. Purchases for the pictorial collections included the sketchbooks of the military artist E. A. Williams, six important early Maori portraits by an unknown artist, and the portrait of Tu, Pomare I of Tahiti, painted by John Webber in 1777 on Cook's third voyage (see *Turnbull Library Record*, October 1978, p. 112–114).

The Library continues to receive under the compulsory deposit provisions of the Copyright Act, administered by the General Assembly Library, a comprehensive range of materials published in New Zealand.

The Library is once again indebted to those who have contributed by donation to the growth of the collections and acknowledges their generosity. The Alexander Turnbull Library Endowment Trust has continued to make funds available for the purchase of highly priced books, manuscripts, maps and paintings and for related activities.
